US EPA RECORDS CENTER REGION 5

RE: EPA Dayton Electroplating Site
1030 Valley Street, Dayton, Ohio 45404
Theft of items

Dear Mr. Richardson:

This correspondence is to notify your firm of the incident that occurred during the time from April 22, 1997 to May 19, 1997 at the above referenced facility where certain items (such as computers, monitors, fax machine) were stolen. Attached is a copy of the police report (# 02565883) concerning this incident.

Riedel/Smith Technology hired your firm to perform security services at the above referenced site with a 24 hour on-site security guard in accordance with the terms and conditions set forth in Riedel/Smith Technology's Purchase Order and subcontract documents. The attached police report indicates that the individual(s) entered the building with a pass key and removed the equipment through a window separating the reception area from the office, as the door between these two areas remained locked.

It is Riedel/Smith Technology's position that Maximum Security failed to perform its contractual warranties and was either negligent by its omission to act, or exhibited willful misconduct, in performing security services which resulted in the loss of the equipment, and therefore is responsible for the loss. The equipment has been valued at approximately \$21,500.00 as referenced within the police report. Also attached is an itemized listing of equipment stolen (as "Attachment to Schedule B, No. 4"), along with corresponding values.

Please contact me at our Chicago Illinois Office to further discuss the resolution of this matter.

Sincerely:
RIEDEL/SMITH TECHNOLOGY
